Cancel claim 36.

In claim 34, line 12, after "output", delete "." And insert --;--.

In claim 34, line 13, (end of claim), insert --propagating said differential output current along an output transmission line; and, matching propagation delays of said local oscillator transmission line and said output transmission line.--.

In claims 14, 15 and 16, line 1, between "wherein" and "impedance", delete "the" and insert --an--.

In claim 24, line 3, between "wherein" and "differential", delete "said" and insert --a--.

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: the prior arts of record fail to teach a multiplying digital-to-analog converter comprising: a plurality of multiplying cells, wherein each multiplying cell is connected to a differential local oscillator bias signal voltage; a local oscillator transmission line wherein said differential local oscillator bias signal voltage is provided on said local oscillator transmission line, and each of said plurality of multiplying cells is connected to said local oscillator transmission line; a digital input including a plurality of bits, wherein each bit is connected to a binary-weighted number of said multiplying cells; an output connected to each of said plurality of multiplying cells, wherein a differential output current is provided at said output; and an output transmission line wherein said output is provided on said output transmission line; and each of said local oscillator transmission line and said output transmission line has a propagation delay and said propagation delays are matched.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
